

Technical Data Sheet

TBIO Humikey 14 Liquid

Physical Properties

Form: Liquid
Color: Black
Smell: Mild Odor
pH: 9-11

Chemical Properties

Total Humic Acid (w/w): 14%
Fulvic Acid (w/w): 2.6 %
Potassium (w/w): 1.1 %

General Information

TBIO Humikey 14 Liquid is concentrated humic acid extracted from young active leonardite mine with liquid form, the shorter molecular weight enhances its chelating capability and activities, enables it more easily to be uptook by plant.

Packaging and storage

Available in 1 Liter, 5 Liter, 20 Liter, 200 Liter net plastic bottle/drums.

To be stored in a dry, clean, dark, well ventilated, moisture proof place. When stored under normal conditions in original unopened containers, no change of its physical, chemical and biological properties will occur in a minimum of 2 years.

* **Caution:** the miscibility test should be done before formulate with pesticide and fertilizer.
